We recently published six new species of *Cryptochironomus* Kieffer (Diptera, Chironomidae) from the Nearctic region. However, the authors made some errors in couplet 4, in that the values given in the second alternative of the couplet do not agree with in the least the values that appear further down the key (couplet 7, etc.), and parentheses were missing in authorities of three species. In this corrigendum, we revise the key to Nearctic males of *Cryptochironomus*. We thank Dr. Martin Spies (Zoologische Staatssammlung München, München) for kindly pointing out the error in contradictions between couplets.

Key to Nearctic males of *Cryptochironomus* Kieffer

The key adapted from Sæther 2009.
